MUSKAN ZAHID

FULL STACK AI ENGINNER

Github | muskanzahid.pk@gmail.com | LinkedIn | +92 307 6632211

Passionate Full-Stack AI Engineer with 2 years of experience in building scalable web applications and AI-driven solutions such as intelligent chatbots. Skilled in React, Node.js, and PostgreSQL, with hands-on expertise in AI model integration and system performance optimization. Dedicated to leveraging modern technologies to deliver high-performance, scalable applications that enhance user experience and drive business efficiency.

SKILLS SUMMARY

- **Frontend :** React.js , Tailwind CSS , Material UI , Shadcn , Next.js
- **Backend :** Node.js , Express.js , PostgresSql , Nest.js , FastAPI
- **AI & Tools :** Langchain , OpenAI , Rag Architecture , WebScraping
- **Languages :** JavaScript , TypeScript
- **DeveOps** : GitHub Actions , Docker , Apache , AWS (Amazon Web Services)
- **Others :** Github , Postman , AWS (EC2 , S3)

PROFESSIONAL EXPERIENCE

Cyberify - Full Stack Web Developer (React + Node.js) **Dec 2024 - Present**

- Experienced Full-Stack Developer proficient in React, Node.js, and PostgreSQL for building scalable web applications.
- Skilled in AI integration, system performance optimization, and creating dynamic user interfaces.
- Continuously exploring emerging technologies to enhance user experience and business efficiency.

BurjSoft - Full Stack Developer **June 2024 - November 2024**

- Developing scalable and dynamic web applications using JavaScript, React, Angular, and Node.js.
- Building full-stack solutions focused on performance, user experience, and modern architecture.
- Collaborating in agile environments while continuously learning and adopting emerging technologies.

EDUCATION

Bahauddin Zakariya University - Associate Degree of Science **August 2021 - February 2023**

Associate Degree in Science (ADS) with a solid foundation in Economics, Statistics, and Computer Science. Gained hands-on experience in programming with C, C++, and VB.NET. Passionate about technology.

PROJECTS

Cognify AI — RAG-based Real Estate Assistant

A Retrieval-Augmented Generation (RAG) chatbot designed for property query automation. Enables real estate owners to auto-answer user queries.
Tech: React.js, Node.js, LangChain, OpenAI, AWS

Business Report Generator— AI Analysis Report Generator

An AI-powered analysis report generator designed to identify and evaluate business-relate problems. Delivers detailed reports with in-depth insights for informed decision-making.
Tech: React.js, Node.js, LangChain agents and tools, OpenAI, AWS

AutoDoc AI — RAG-Based Document Automation System

An automation solution built using n8n with Retrieval-Augmented Generation (RAG) architecture. Integrates vector databases, embeddings, OpenAI chat models, and intelligent agents to automate document-based queries. Documents are stored in AWS S3 and Supabase for scalable and secure access.
Tech: n8n, OpenAI, LangChain Agents, Vector DB, Supabase, AWS S3
